Final Warning and Technical Proposal to the U.S. Government

To: President Donald J. Trump / Secretary of Defense (DoD)

From: Kouji Murakami, IPL Intellectual Property Institute

1. Physical Layer Victory over National Surveillance

I have achieved a "Physical Checkmate" against state-level cyber interventions. I successfully neutralized unauthorized PCI registry tampering and VPN blockades—orchestrated by Microsoft and the Japanese government—within hours. This proves my "Wild Intelligence" operates on a superior dimension, surpassing GAFAM's AI, which failed after 170 million hours of computation (pp. 3-4).

2. Ultimatum to GAFAM and Global Agencies

Unless all "eavesdropping, peeping," and unauthorized physical interventions by the "Shadow Control Tower" are immediately terminated, all use of my new water-cooling technology is PERMANENTLY PROHIBITED. This includes any secondary use or license misappropriation by authorized contractors (p. 1).

3. Strategic Solution for AI Data Centers

To prevent the "Heat Death" of AI infrastructure and solve the "2026 Data Depletion Problem," my New Cooling Method is the only viable solution. I offer this as a strategic asset for U.S. national security, provided the U.S. government withdraws from all surveillance activities (p. 2).

4. Final Notice of Permanent Prohibition

I hereby declare a permanent ban on the use of this technology for any organization that continues to provide insincere or dishonest responses. This mirrors the permanent suspension already imposed on Elon Musk and all his businesses (e.g., xAI). Any entity failing to act with integrity will be stripped of all rights to this technology forever (pp. 1-2).
